EDUCATION

Addis Ababa University || AAiT

Sep 2020 – July 2025

Bachelor of Computer Software Engineering (CGPA: 3.55/ 4.0)

Relevant Coursework: Algorithm Design And Data Structures, Java, Python, Operating Systems, Computer Architecture, Object-Oriented Programming, Relational Databases, Fundamentals Of AI, Web Development, Cyber Security

MY PROJECTS

[E-Shop](#)

Description: I specialize in creating an electronics web app that facilitates buying and selling experiences for mobile devices, laptops, desktops, and watches.

Tools: [Prisma](#) , [MongoDb](#) ,[Next.js](#) ,[Tailwindcss](#).

[Home Rental Web App](#)

Description: I specialize in developing a Rental House web app designed for the Ethiopian market, allowing users to easily find and rent houses.

Tools: [React.js](#) , [Bootstrap](#) , CSS,[Nest.Js](#) and [Prisma](#)

[E-Learning Platform](#)

Description: I have created and developed an Educational Learning web app that provides students with the opportunity to learn a wide range of courses freely. Teachers can create accounts, offer tutorials, conduct exams, and issue certificates to students, all within the platform.

Tools: [Angular](#) , [Angular Material](#) and [Tailwindcss](#) , [Nest.js](#) and [Prisma](#) ,[JWT](#) .

[Home Insurance Mobile App](#)

Description: I collaborated with my friends to develop a Home Insurance mobile app .Our focus was on delivering the best UI and UX design to provide a seamless and visually appealing experience for users. Additionally, thorough testing was conducted to ensure the app's reliability and performance. This collaborative effort resulted in a robust Home Insurance mobile app that combines cutting-edge technology with a user-friendly interface.

Tools: [Flutter](#) , [BLoC](#) ,[Nest.js](#) and [Prisma](#).

[Music Listening](#)

Description: I independently developed a Music Listing app.

Tools: [React.js](#) ,[Emotion](#) ,[Redux](#) and [Redux Toolkit](#).

[3D Chat Bot With Integration Of chatGPT 3.5](#)

Description: The application also features a Canvas component for dynamic visual content, providing an engaging user experience. To enhance accessibility, I've incorporated a text-to-audio converter, allowing users to listen to the content.

Tools: [Next.js](#) ,[chat GPT 3.5](#) API,Tailwinds.
